Learning • Knowledge • Quiz  
"A Competition To Unite"

**GRAND FINALE**

28th Indian Plumbing Conference will be the biggest confluence of plumbing and building industry experts from across the globe in 2022. The conference is strategically planned in Pune- The Oxford of the East. Pune is a vibrant city located just 175 kms away from India's economic capital: Mumbai. Pune is fast emerging as the favourite destination for start-ups and technological fraternity. More and more companies are now looking forward to Pune for establishing their R&D centres and Product Development hubs as the city provides them far better

resources and an environment which encourages innovation.

Pune has India's 1st State of Art Plumbing lab at COEP and the city is known to implement latest plumbing technology first time in India like Siphonic system, Single stack system, Toilet pods.

## Advancement In Plumbing for Built Environment

Indian Real estate has been witnessing very fast growth in the recent years, as the demand for built environment is on the rise. The real estate sector in India is expected to reach a market size of US \$ 1 trillion by 2023 from US \$ 120 million in 2017. These new building structures will need meticulous planning and execution of all aspects of these built structures including Mechanical, Electrical and Plumbing.

Plumbing is a science and Plumbing not only constitutes 13%- 15% of a building's structure cost, but is also a very crucial service as there are only two live lines in a building: Plumbing and Electrical. Plumbing not only is responsible for supplying you water but it also takes away your waste in a hygienic manner. In the recent times there have been a lot of advancements in Plumbing that lead to more efficient and sustainable water management. But, the irony is that these advancements and best plumbing practices do not reach out to building industry professionals. Through this conference, we wish to address this area and disseminate knowledge on innovations and best practices.

### SESSIONS

Moving towards Implementation of Bharat Tap through Low Flow Fixtures & Sanitaryware

Reclamation of Water & Water Sources

Water Audit, BMS and IoT in Plumbing Applications

24 x 7 Water Supply

Case Studies on Achieving Net Zero Water & Waste

Conveniences in Public Spaces

## Star Attractions of 28th Indian Plumbing Conference at Pune

Meet Who's Who of the Plumbing and Building Industry

Forum to exchange ideas and information on plumbing and building technologies

Concurrent Exhibition showcasing innovative technologies of plumbing and allied products

Interactive Panel Discussions and Technical sessions

Opportunities for B2B Interactions with domain experts

## DISPLAY PROFILE

Pipes & Fittings, Pumps, Valves & Fittings, Sanitary Fixture, Sanitaryware, Fire Fighting Equipment & Systems, Drainage Solutions, Water Treatment Plants, Swimming Pool & Fountain Technologies, Water Heater and Heating Systems, Rainwater Harvesting & Water Storage Systems, Sealants and Adhesives, Sinks, Sewage Treatment Plants, Building Automation Systems, Water Filtration & Purification Plants, Solar Heating System, Bath Tubs, Shower Channels & Enclosures, Water Meter & Manhole Covers and allied products.
