

Seminar on "Water Conservation and Artificial Recharge of Groundwater with special emphasis in urban areas"
15th November

Indian Plumbing Association Hyderabad Chapter and Thermax Limited jointly organized a Seminar and Technical Presentation on "Water Conservation and Artificial Recharge of Groundwater with special emphasis in urban areas". D. Subba Rao, Regional Director, Central Ground Water Board, Hyderabad was the Chief Guest at the event. Dr. Praveen Kumar, Scientist, Ministry of Jal Shakti, Central Ground Water Board, Southern Region, Hyderabad was also present at the event. D. Subba Rao spoke on the initiatives taken by the Central Ground Water Board.

Srinivas Chary, Director, Centre for Energy, Environment, Urban Governance and Infrastructure Development from ASCI (Administrative Staff College of India) was the second speaker at the event. He elaborated on the Swatch Bharat program and his initiative in collecting sewage waste at a centralized place for treatment instead of dumping it in the lakes. Thermax presented their latest products in sewage treatment technology. The event registered an attendance of 130 people from the plumbing and building fraternity.
