

Questions of importance to plumbing professionals would be published periodically in IPT, with the view to get opinions/clarifications.

IPA Debate Club was an established column earlier but was discontinued for some time.

Through the Debate Club, IPT wants to involve all for the benefit of the plumbing fraternity.

Answers, duly vetted by IPA Technical Committee would be published in IPT. The decision of the IPA TC would not be subject to any challenge or counter claim.

Name of the responding person, whose answer is close to the correct answer, would also be printed in IPT. The decision of the IPA TC would not be subject to any challenge or counter claim.

**Name of the responding person, whose answer is close to the correct answer, would be printed in IPT.**

Convener, IPA Technical Committee

## IPA DEBATE CLUB QUESTION 8, IPADCQ-8

- Q.1 Will there be impact in sizing of vertical Rain Water Down take for roof area based on inlet type, that is side inlet v/s top inlet.**
- Q.2 How to calculate the flow through the roof rain water pipes for a given area of the roof based on the inlet type.**
- Q.3 Do we require AIR RELEASE VALVE for vertical down takes water pipes when water is supplied from overhead water tank by gravity.**

Please send in your replies (along with full Name, Designation, IPA Membership No. and contact details) latest by 15<sup>th</sup> September to
